- High Safety Required Use -

This Product is designed, developed and manufactured as contemplated for general use, including without limitation, general office use, personal use, household use, and ordinary industrial use, but is NOT designed, developed and manufactured as contemplated for use accompanying fatal risks or dangers that, unless extremely high safety is secured, could lead directly to death, personal injury, severe physical damage or other loss (hereinafter "High Safety Required Use"), including without limitation, nuclear reaction control in nuclear facility, aircraft flight control, air traffic control, mass transport control, medical life support system, missile launch control in weapon system.

If user does not perform secure measures required in assuring High Safety Required Use, user shall NOT use this software. PFU Limited and related companies accept no claims from customers and third parties in relation to, and accept no responsibility for any losses incurred as a result of, the use of this software for High Safety Required Use.

1. Cautions for Installation

- =====
- * This product is designed to work on following operating systems.

- Microsoft(R) Windows(R) 2000 Professional
- Microsoft(R) Windows(R) XP Professional(32-bit version only)
- Microsoft(R) Windows(R) XP Home Edition
- Microsoft(R) Windows Vista(R) Home Basic (32-bit and 64-bit versions)
- Microsoft(R) Windows Vista(R) Home Premium (32-bit and 64-bit versions)
- Microsoft(R) Windows Vista(R) Business (32-bit and 64-bit versions)
- Microsoft(R) Windows Vista(R) Enterprise (32-bit and 64-bit versions)
- Microsoft(R) Windows Vista(R) Ultimate (32-bit and 64-bit versions)

Internet Explorer 5.5 or later version must be installed.

- * To install this product, please login as Administrator or a member of Administrators Group (or as a user having administrative right).
- * Before beginning the installation, end all applications and turn off any virus software.
- * The message, "Please insert CD-ROM of operating system" may appear. Some functions of this product do not work if installation is continued without inserting operating system CD-ROM. If this occurs, please install again after removing from the computer.

2. Cautions for Removal

- =====
- * To remove this product, please login as Administrator or a member of Administrators Group (or as a user having administrative right).
 - * Please restart your computer prior to removal of this product. Removal may not be done correctly if your system is not restarted.
 - * "Are you going to remove shared file(s)?" message may come up. If you remove shared files or any other programs still requiring the file(s), these programs may not function properly.

3. Cautions for Use

- =====
- * Default printer may switch to "Raku2 ImageWriter" if program goes into abnormal status during insert file (image conversion) process.

- * Settings on "Raku2 ImageWriter" such as paper size and print orientation may not be effective on some applications.
- * Input File and Edit source file functions may not operate properly if a target or source file is opened by another application. Please close applications or binders which open target or source files, and process again.
- * Input File function may not operate properly if the application associated with target file is running, or Input File is in progress on other binder. Please close the associated application, or wait until Input File is done on other binder, and then try again.
- * Input File and Edit source file functions may not operate properly if the application associated with target or source file is running and printing. Please do not operate Input File and Edit source file in this situation.
- * Raku2 ImageWriter may output rotated image as a result of Input File operation due to specifications of associated applications.
- * Input File may be failed if user is switched without logout operation on Windows XP.
- * Flip speed in rotated mode may be slower than original mode due to CPU performance.
- * Results of Input File of PDF document sometimes do not match with image in the PDF document. Please change paper size and paper orientation in properties screen of "Raku2 ImageWriter", and try again.
- * If ScanSnap starts reading data before the Rack2-Viewer window exits, the data read by ScanSnap and imported to Rack2-Viewer may not be imported to the Rack2-Viewer window (or temporary binder).
- * Window title and taskbar will not be displayed if Rack2-Viewer window is maximized.
- * Binder selection dialog sometimes comes up during Input File operation to convert Excel file into image. In this case, please switch printer to "Raku2 ImageWriter" on Excel, overwrite target file, and try again.
- * Text extraction in selected range sometimes does not pick up all texts due to font size and font type. In this case, please select wider range, and try again.
- * 16-bit and 32-bit (number of bits per pixel is 16 and 32) full-color images may not be imported even if their image formats are supported.
Open the file from the paint program (installed as standard in Windows) or other image processing software, save the file in a different format (Jpeg, etc.), and try again.
- * When "Windows should open PDF files using the" is specified as "Rack2-Viewer" in the Rack2-Viewer settings, and multiple users have the PDF open with the explorer at the same time, if changes are made an error may occur.

This also pertains to opening the Rack2-Viewer window by right-clicking on the PDF and selecting "Open with".
- * When "Windows should open PDF files using the" is specified as "Rack2-Viewer" in the Rack2-Viewer settings, and sheets or pages that were saved from the Rack2-Viewer window to the local disk in PDF format binder (with source file) are deleted with the explorer, the source file data remains on the local disk.
- * For Windows VISTA DPI Scaling, if a scale other than the Default Scale (96DPI) is set, it may not be shown on the screen.
Make sure that DPI Scaling is set to Default Scale (96DPI).
- * If heavily loaded, this may cause an error when importing files. In this case, close all applications and try again.

4. Confirmed e-mail software for Send Mail function

Following e-mail software are confirmed that these software work well with Send Mail function of Rack2-Viewer.

Becky! Internet Mail Ver.2(2.31.00)
Eudora V7.0
OutLook
OutLook Express
Windows Mail

Note: On some e-mail software, e-mail software window executed by Send Mail function may be hidden by other windows. In this case, please select the e-mail software

window from Taskbar to continue Send Mail process.
