

PaperStream IP OCR Optimization Assistant for fi Series change history

Version 1.1.0

New feature:

1. The following operating systems are now supported:
Windows Server® 2025 Standard

Corrected issue:

1. Due to the end of Microsoft's extended support for Visual Studio 2013, the Visual C++ 2013 runtime has been removed from the PaperStream IP OCR Optimal Image Quality Settings Tool for fi Series and is no longer used.

Version 1.0.0

- The new tool is released for analyzing image quality settings and creating PaperStream IP profiles to improve OCR accuracy for black and white images.
