PaperStream ClickScan Change history

Version 1.3.0

New features:

1. The PaperStream Connector Option is now supported.

2. The following options have been added to the printer output function.

   - Page format: Fit the whole image to the paper size and print / Print in actual size
   - Center the image and print
   - Orientation : Auto/Portrait/Landscape
   - Show the Print dialog before printing

Version 1.2.0

New features:

1. fi-8040 and fi-70F are now supported.

2. Word", "Excel", or "PowerPoint" can be specified as a file format.

Improvements:

1. The operation for moving a thumbnail in the preview window has been improved.

2. A modification has been made so that [Assigned to scan operation] is applied to all scanning methods.

3. The setting for not occupying a scanner connected to the network has been added.

Corrected issues:

1. Fixed a bug that occurs while PaperStream ClickScan 1.1.0 was running resident in the system, causing to replace a PaperStream IP profile selected in another application by the driver profile selected in PaperStream ClickScan.

2. When a space was included in the name of a destination folder, establishing a link with an application failed. This problem has been fixed.

3. When an option other than [Off] was selected for [Carrier Sheet], the paper size appeared to be changeable, although it was not. This problem has been fixed.

Other:

1. The required version of Microsoft .Net Framework has been changed to 4.7.2 or later.

Version 1.0.5

Improvements:

1. The Preview Window now supports the assignments for mouse wheel and keyboard.
2. When a new save destination is specified in the Preview window, an option now appears allowing to apply the new destination folder to the save destination setting.
3. Modified the content to display on the panel of connected scanner.
4. Modified the behavior during update installation.
5. Modified the behavior during shutdown/logoff of computer.

Corrected issue:

1. Fixed the problem that may cause searching may not work properly in searchable PDF.

Version 1.0.4

Improvements:

1. Improved behavior of the counter feature attached to filenames.
2. Improved that if there are files with the same name in the destination folder, automatically renamed the filename.

Version 1.0.3

Improvement:

1. Improved installation behavior during updates.

Corrected issues:

1. Corrected an issue where an error message was not displayed when an application did not exist in the application path specified as the output destination.
2. Corrected an issue that searchable PDF is not output when the first page searchable PDF was specified in the PDF output.

Version 1.0.2

Improvement:

1. Fixed the problem that the scanner is not recognized when the USB port is connected to different port.
