

Be sure you log into Windows® as a user with administrator privileges.

1. Download file onto your hard drive.
2. Quit any other applications that are running on your computer.
3. Execute the file that you downloaded in step 1. This creates a folder named "Disk1" in the same folder where the program is stored. Installation starts automatically after self-extraction. If it doesn't start, double-click "Setup.exe" which is located in the Disk1 folder.
4. Follow the instructions from the Installation Wizard to complete the installation.
5. When the installation has completed, go to Control Panel -> [Programs] -> [Programs and Features] and confirm the version is correct.

**[Attention]**

Do not install the software from network shared folder.  
Otherwise the help files may not be displayed correctly after installation.
