

Be sure you log into Windows® as a user with administrator privileges.

1. Create a save destination folder for the file download onto your main hard drive.
2. Download the program for installation.

**Important**

- Be sure to click the [Save] button and direct the download into the folder you created.
  - After downloading, make sure you have enough free disk space (at least more than twice the download file size) for installing the programs.
3. Quit any other applications that are running on your computer.
  4. Double-click the downloaded executable file to unzip its contents.
    - The file is unzipped in the command window which displays with a black background.
    - A folder is created and a file called "Setup.exe" appears in the folder after the unzipping is complete.
  5. Double-click "Setup.exe" to start the installation.

This completes the installation.
