

1. Download and double-click the file. This creates the update file on the hard disk.
2. Install the update file via Network Scanner Admin Tool or Scanner Central Admin Console. Instructions on how to install the update are available from the following sources:
 - For installation via Network Scanner Admin Tool
[N7100 Operator's Guide](#)
 - For installation via Scanner Central Admin Console
[Scanner Central Admin User's Guide](#)
3. Confirm if the installation is successfully completed. To confirm the system version, open the administrator window and go to [Status Details] > [System Status] > [System Version].

The screenshot shows the 'Status Details > System Status' page. The left sidebar contains a navigation menu with items: Status Details, System Status (selected), Usage Status, Installed Options, User Log, System Log, Data Management, User Data Store, System Settings File, Maintenance, and System Update. The main content area displays a table with the following data:

Item	Status
System Version	ABBYY FINE READER ENGINE 14.0.0.0
Scanner Version	14.0.0.0
Initial Use	04/28/2017
Cumulative On Time	00000219 hours

Below the table, there is a copyright notice: 'ABBYY(TM) FineReader(TM) Engine (c)2011 ABBYY, OCR by ABBYY. ABBYY and FineReader are trademarks of ABBYY. Nuance, and the Nuance logo are trademarks and/or registered trademarks of Nuance Communications, Inc. and/or its affiliates in the United States and/or other countries. Foxit PDF SDK copyright (C) Foxit Software, Inc. www.foxitsoftware.com'.

Note:

- It may take over an hour to update the system.
- Scanner's response time may temporarily be longer for 15 minutes in the first launch after the system update because of system optimization processing.

- Although N7100 Touch Panel may flicker during software update, it is not a hardware or software problem.
- SSL3.0 is disabled for security enhancement. Accordingly, SSL3.0 now cannot be used for remote access to N7100 (access from a Windows computer to N7100 via Internet Explorer). Use TLS 1.0 or later for that purpose.
