

Be sure you log into Windows® as a user with administrator privileges.

1. Be sure that PaperStream Capture Pro 4.0.0 or later has been installed on the computer.
2. Download the exe file onto the hard drive.
3. Quit any other applications that are running on your computer.
4. Run the file downloaded during Step2, and the installation program starts automatically after the self-extraction is done.
5. Follow the instructions on the window to install the software.
