

# Sharing Information

We transmit and introduce "information about eco-efficient products" and "environmental activities" via our official website and at events. We are sharing information about sustainability and SDGs on our website.

## "Sustainability" Page on Our Official Website

PFU aims to be a business that can contribute to "solutions to social issues" and "a design for a sustainable society". We have posted a "Sustainability" page on our public website to share information about our way of thinking, course of action, and future direction for "sustainable operation", "environment (E)", "society (S)", and "governance (G)".

In addition, we have built an environment to distribute information within the company to raise awareness of SDGs among workers in the PFU group.

"Sustainability" Page

## Environmental Report

Since 1994, we have been issuing the "PFU Environmental Report" (and the English version since 2003) as our annual environmental report and publishing the report on our official website. In addition to this report, we also share the latest information about eco-efficient products on our official website.

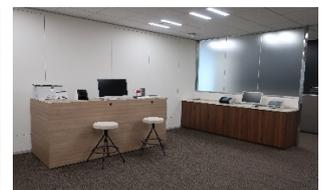

Environmental Report

## Showroom

We set up showrooms at our main sites in Japan to display our eco-efficient products, such as scanners and embedded computer products, and other environmentally conscious solutions.

## Use of Green Power at Events

At the "PFU Christmas Charity Concert" (held in Kanazawa on December 10th), we contributed to spreading the use of natural energy in the nation and mitigating global warming by using renewable energy from wind power to supply the equipment in the venues with electricity.
